Subject: Request for Additional Bond Funding for Groundwater Clean-up

Dear Assemblymember Rendon:

On behalf of the residents and businesses in my district, I request bond funding in your legislation, Assembly Bill 1331, be increased to help address groundwater contamination in the region.

Currently, your bill includes \$1.5 billion for competitive grants and loans for public benefits associated with projects that expand the state's water storage capacity. One of the five specified purposes is to "remediate or prevent contamination of groundwater aquifers."

Due to the statewide pressure for these scarce bond funds, more funding should be added to remediate or prevent contamination of groundwater aquifers, in areas where there are regional water storage benefits for more than one drinking water supplier.

I commend you for your strong leadership on issues related to the state water bond, especially your efforts as head of the Assembly Water Bond Working Group.

Please let me know how we can work together to place the most effective water bond proposal on the statewide ballot this year.

Sincerely,

Assemblymember Tom Daly
69th Assembly District
